Nature's treasures · Salt Care
QI Power Salt · Chung Jung One OEM Brand

History of Company

1999~

1999. 04. Established Chungsoo Food Inc.
06. Made OEM Contract with Daesang Food Inc. as a supplier of Chungjungone Roasted Salt
09. Made an export contract with Qi Power Inc. Japan
2000. 03. Applied for SALT CARE trademark registration
2001. 12. Made a contract with Qi Power Inc. Japan for the manufacturing on commission through the use of patented process
2002. 07 Acquired Quality Management System Certificate from Korea Productivity Center
2003 09. Selected by Daesang Inc. as best partner company
09. Acquired Quality Management System Certificate from Korea Productivity Center (KSA 9001:2001 / ISO 9001:2000)

2004~

2004. 08. Appointed as a promising small and medium-sized export business by Jeonnam Small & Medium Business Export Support Center
2005. 10. Appointed as a CLEAN business by Korea Occupational Safety & Health Agency under the Ministry of Labor
2006 10. Appointed as a promising small & medium-sized business by Jeonnam Province (KSA 9001:2004 / ISO 14001:2004)
2007 02 Appointed as a promising small and medium-sized export business by Jeonnam Province
09. Awarded a prize as a Proud Small & Medium-sized Business Entrepreneur by the Administrator of Jeonnam Small & Medium Business Administration

2008~

2008. 03. Awarded as a trusted taxpayer by the Superintendent of Mokpo District Tax Office
06. Acquired "Namdo Mihyang" certificate, a joint brand of Jeonnam small & medium business
2009. 03. Applied for patents for the scent-added salt and onion salt manufacturing method (2 applications))
2010. 01. Selected as a 'Sohomyeongga' by Kwangju Bank
04. Applied for a patent for reducing salt manufacturing method
2011. 06. Appointed as a promising small and medium-sized business by Jeonnam Province
12. Awarded a prize for city-rural areas exchange promotion by the President

2012~

2008. 06. Appointed as a promising small and medium-sized export business by Jeonnam Province
2013 07. Applied for patents for the bamboo salt manufacturing method which enables control of functional elements quantity using red clay ceramic container and related bamboo salt products
2014 01. Applied for patents for the manufacturing method of mineral bamboo salt using sulphate and related mineral bamboo salt products
03. Appointed as an IP Star Company by the Jeonnam Intellectual Property Center
04. Established K-SALT Inc. K-SALT corporation construction
12. Acquired certificate of HACCP applied establishment
2015. 10. Acquired certificate of Hala applied establishment

Vision

Chungsoo Food/ K-SALT Inc. specializes in producing processed salt using solar salt, such as healthy roasted salt and bamboo salt as well as beauty salt providing health benefits. Chungsoo Food Inc. holds to the environmentally friendly corporate principle of always putting nature and people first and endeavor to keep up with continuous research and development.

- We are an environmental friendly company that the puts health and happiness of our customers and nature first
- We make products that keep our customers coming back
- We do our best for customers and strive to make our best efforts for customer satisfaction
- We provide our customers with touching experiences through the best quality and expertise
- We don't limit ourselves to the domestic market and always aim for export and overseas markets.
- We aim to keep up with continuous R&D for new products and patent registration.
- We produce and supply our products both in B2B and B2C.

Chungsoo Food/ K-SALT Inc. is an environmentally friendly company that values nature and humans most.

1. Chungsoo Food/ K-SALT Inc. is the unique manufacturer in Korea, which produce the roasted salt by baking at a high temperature of 800℃ and above.

   We manufacture the roasted alkaline salt will full of natural minerals free from any harmful substances such as impurities, toxins, and heavy metals via a high temperature roasting process.

2. Chungsoo Food/ K-SALT Inc. acquired 2 patents for the manufactruing method of reduction salt (bamboo salt) and has been exporting bamboo salt with its best reduction power to Japan.

   We have been exporting the special bamboo salt in the name of QI POWER SALT and QI POWER ORIGIN to Japan for more than 10 years.

3. Chungsoo Food/ K-SALT Inc. has its own salt field and processing facility for solar salt in the clean area.

   We make solar salt at our own salt field located in Palgeum-myeon, Sinan-gun where is designated as natural clean area by the Korean ministry of environment and produce a multi-purpose solar salt in our own processing facility located at Cheonggye-myeon, Muan-gun near from the salt field.

4. Chungsoo Food/ K-SALT Inc . acquired certificates of ISO22000, and HACCP.

   We have been pursuing the best quality products through the Quality Management System and Environment Management System for 10 years and acquired the HACCP.

5. Chungsoo Food/ K-SALT Inc. is supplying the products to Daesang Inc. on OEM base and is specializesd in producing roasted salt, solar salt and bamboo salt.

   We are a relaialbe OEM supplier to Daesang Inc in the name of Chungjungwon as we are producing roasted salt, solar salt, and bamboo salt with our best expertise and know-how.

Large Heated Dryer Equipment

Completion Of Salt Processing Complex(Collect, Storage, Packing For Solar Salt)

Automatic Packaging Machine Extended Equipment

‘Nature's treasure’ created by the clean sea, sunshine and wind.

'Nature's treasures' are baked at high temperature of 800 ℃ and are clean and excellent in reducing power. This is an alkaline salt with impurities and toxic substances removed This gives a healthier meal.

자연의 보배

Table Salt

Nature's treasure brand offers a wide range of salts based on the main ingredient of solar salt

Roasted Solar Salt

By being roasted over 800℃, the natural salt is free from any impurities, toxins and it changes to alkaline salt with mild and soft taste

All cooking

Garlic Salt

This premium seasoning salt is mixed with 100% Korean solar salt and extracts of local garlic from Muan

For meat and fish dishes

Onion Salt

This premium seasoning salt is mixed with 100% Korean roasted solar salt and extracts of local onion from Muan, Jeonnam

For meat and fish dishes

Bamboo Salt

The special salt with the utmost reduction power which is roasted inside bamboo

Advanced for cooking

Salicomia Herbacea Salt

This salt has a rich flavor, formed from mud flats in Sinan Island, also known as 'The Ginseng of the Sea,' collected from clean mud flats

Advanced for cooking

Lotus Leaf Salt

Muan lotus leaf salt is the combination of Korean solar salt and ingredients from famous local lotus leaf from Muan, Jeonnam

Advanced for cooking

SALT CARE

Bath & Beauty Salt

Salt Care brand keeps skin beautiful and provides rest of daily life with fine salt particles and healthy ingredients. Use it when your neck and shoulders are tense and tired to help recover from fatigue.

How to use

Body massage	If applied to wet skin, please take a small amount of salt. Gently rub the skin with about 4 to 5 times of salt
Salt bath	Dissolve 100 g of beauty salt in 50 liters of water at 40 ˚C and let it stand for 10 to 20 minutes
Feminine cleanser	3T spoon of beauty salt, Wash it by loosening it to about 600cc of water (3 cups)
Scalp massage	Please massage 5t spoon with lukewarm water 600cc (3 cups)

GREEN TEA SALT

The new concept of skin care salt contains fine substances from green tea and rich vitamin A and C

BAMBOO SALT

A roasted salt inside bamboo at high temperatures of 800℃, containing ingredients from Korean bamboo and red clay

HERBAL SALT

It gives you more freshness with its rich minerals and mint

MUGWORT SALT

Contains pure ingredients from mugwort which has long been used as a natural antibiotic in oriental medicine and known to be free from side effects and resistance

QI POWER SALT · CHUNG JUNG ONE

OEM Brand

We have been supplying OEM products of large enterprises for many years with our differentiated advanced equipment and technology.

QI POWER SALT SERIES

This salt is roasted by a high temperature roasting method (patented manufacturing method) with salt collected by using a traditional Korean desalination method that extracts only the salt crystalized in sea water of which the salt concentration is enhanced by solar heat after gathering sea water from the West sea into a salt field

QI POWER SALT

This table salt has a great reduction power as it is produced through a high temperature roasting process with Korean solar salt and bamboo

QI POWER ORIGIN

Roasted at a high temperature of over 1200℃, breaking down and eliminating harmful substances. It also has ORP of 500mV

CHUNG JUNG ONE OEM

Chungsoo Food Inc. carries out constant R&D efforts to produce safe and beneficial food to promote public health, meeting customer needs through Daesang Chungjungone OEM

ROASTED SOLAR SALT

Roasted salt is made of solar salt from mud flats in Sinan Island, baked at 800℃ to eliminate toxic substances

SEASONING SOLAR SALT

Seasoned salt produced on Sinan Island and coated with seasoning ingredients

GARLIC SALT

Domestic garlic salt grown in ocher

SALICOMIA HERBARCEA SALT

Nutrient salts such as 'The Ginseng of the Sea'

SEAWEEDS SALT

A deep, refreshing salt of pure seaweed

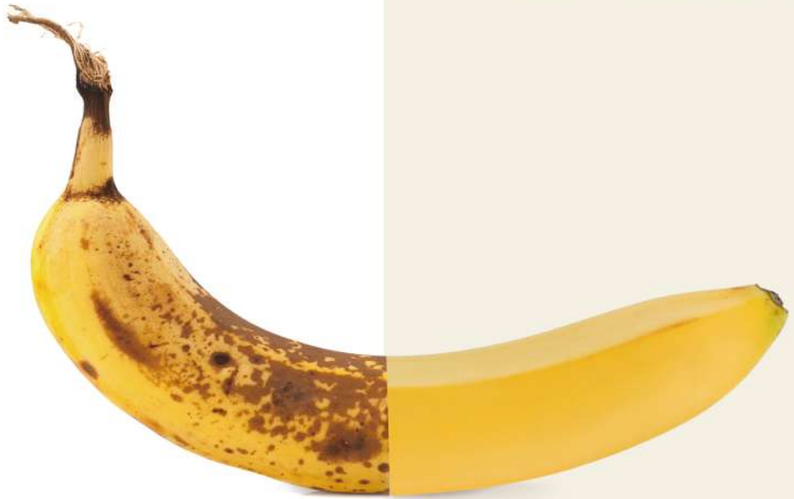
REDUCING POWER

About reducing power

The reducing power is a measure of how actively the oxidation and reduction occur in the human body. Oxidation of the human body is an aging process in which the function of the body is diminished by the accumulation of wastes and toxins, the reduction is a normalizing process in which the function of the body is normalized by excretion of wastes and toxins through immune interaction or purification.

ORP(Oxidation Reduction Potential) Actual measurement value

It is a sign of strength in which a substance tends to oxidize or be reduced. In a solution that contains an oxidizing agent and a reducing agent, the non-invasive electrode in the solution is used. This refers to the potential between the electrodes and the solution when immersed.



Oxidizing power [酸化力]

Oxidation refers to the combination of oxygen and hydrogen, hydrogen's fall, and Increased oxidation (reducing the number of electrons). A typical oxidation reaction is the rusting of iron, combustion of matter, In other words, burning or explosion is an example of a quick oxidation reaction in which matter rapidly combines with oxygen. The force with which it is held is called oxidation.

1015mV (H+)

Oxidation

−620mV (OH−)

Reduction

Reducing power[還元力]

On the other hand, there is a reaction that oxides lose oxygen. It's a 'Reduction'. reduction refers to the Separation from oxygen, hydrogen bonds, a decrease in oxidation, and an increase in the number of electrons. In other words, the force that returns an oxidized substance to its original state is called the reducing power.

Roasted Sea Salt & Bamboo Salt

Features of the Roasted Sea Salt

Heavy metals, except lead, vaporize at 800° C, which is the melting point of salt; the roasted salt maintains the minerals of a solar salt with high (and hazard-free) alkalinity and reducing power. 800° C is the ideal temperature to roast salt.

Hydrogen Exponent (pH Level)

pH is the measurement for acidity, calculated by taking the common logarithm of the reciprocal of hydrogen-ion concentration. pH 7 is called "neutral" ; a higher pH level is called, "alkaline" ; and a lower pH level is called, "acidic." Also known as hydrogen-ion exponent, pH level is an important indicator of water quality.

ORP

Soft Drink 410mV | Tap Water 350mV | Beer 315mV | Mineral Water 295mV | Wine 240mV | Coffee 175mV | Cucumber -120mV | Bamboo salt -200mV~-250mV | Hwan won jeong -500mV

Oxidizing — Reduction

pH

Cheese 3.0 | Beef 4.0 | Chicken 5.0 | Corn 6.0 | Eggs 7.0 | Grapefruit 8.0 | Roasted Salt 10.0~11.0

Acidic — Neutral — Alkaline
