Established in September 2007, **Chungmec Co., Ltd** is an agricultural-based food company that grows, manufactures and sells color barley with local farmers based on the functionality of color barley (black, blue barely, barley, violet barley and etc.) rich in minerals and dietary fiber. Since the establishment, starting with the first processing of color barley, the company currently produces 3-colored barley rice, 5-colored barley rice, whole grain powder/whole grain powder plus, barley coffee and etc. under thorough management based on GAP facilities and producers certification, environment-friendly agricultural product transactor certification and organic processed food certification. It is a agricultural food company that has been developing gradually with achievements such as winning grand prize at Mutual Cooperation Contest, Beloved Company of Republic of Korea Award and Prime Minister Award at Agricultural Science and Technology Award, through positive evaluation of its contribution to preserving farm income by operating a continuous and organic contract cultivation and purchase system with local farmers.

3-colored barley rice 800g

Since its launch in domestic market in 2017, after 2018, it has been supplied to mainstream society through large distribution in the U.S. and Chinese market, and it is 3 colored product with different health and nutrition characteristics in each color. It was introduced as a healthy diet ingredient through various public broadcasting media in the Korean market. It is a whole grain product containing a large amount of high-gradedietary fiber and β-glucan. In advanced countries such as the U.S., barley consumption is increasing instead of wheat as an alternative to gluten-free. GAP facilities and producers certified agricultural product. The U.S. FDA registration (Facility Registration Number:12401082546)
