

Post-Operative Solution
From **H**ospital to **H**ome

Surgical · Physio · Rehab · Sports · Beauty · Health
Since 1986

Welcome to DS MAREF.

A company that promotes
the health and happiness of all mankind

Since 1986, _____

DS MAREF is leading company having the most selections in various pneumatic medical systems like DVT prevention, Lymphedema, Thermotherapy, Tourniquet, Rehabilitation, and Homecare product since 1986.

We develop and manufacture a wide range of products, from surgery assistive devices, physiotherapy and rehabilitation devices for life extension and prevention to diseases to medical devices usable in life, such as beauty devices and home care devices that are close to our daily lives.

Professional R&D,
and Billions of exportation

H2H Post-Operative Solution

Total pneumatic post-operative cares as the best option of for alternative medicine

Medical Market Changes

Early Discharge & Recovery

MOH, Insurance and hospitals want to discharge patients earlier to save money. Patients want to recovery for their health and returning normal life quickly.

Post-Operative Cares

PRE / INTRA OPERATIVE (OR)

POST OPERATIVE CARE (ICU / RECOVERY ROOM)

PHYSIO THERAPY ROOM

HOME (PRESCRIPTION / RENTAL)

PRE & INTRA OPERATIVE

DTS-3000

The Pneumatic Tourniquet System

DTS-3000 is a smart tourniquet system having advanced functions like automatic. IOP sensor, recording function, max pressure, 700mmHg, 7" TFT LCD touch key screen, visible alarm system with sound for safety, and a built-in battery.

| Main features

- + Include individual controller
- + Setting confirmation and convenient operation via LCD
- + IOP (Individual Occlusion Pressure) system
- + Special no-pinch cuffs of various sizes and types
- + Adjustment of degree settings according to patient
- + Patient status recording via SD card

Individual Occlusion Pressure (IOP)

DTS-3000 can recommend individual IOP(Individual Occlusion Pressure) RTP parameter by analyzing oxygen saturation with SPO2 sensor.

Records informations with SD Card

DTS-3000 records effectively operation time, pressure and error during operation by a real-time clock.

RTC(Real Time Clock) is mounted all the information that may occur during operation of the apparatus. You can record to SD Card in real-time.

+ General Cuff

Most tourniquets have generally a pinch inner side. So it can be a cause of skin damage or blood leakage.

VS

+ No-Pinch Cuff

Our No-Pinch Cuff is our won patented technology. it focused on preventing any skin damage or blood leakage.

DVT-Series

The Facility of DVT-pumps

DVT-4000S ART

Professional DVT Prevention system

DVT-4000s is designed to manage and monitor continually the status and progress of DVT prophylaxis in high-risk patients, especially those requiring long-term prevention at home after leaving hospital as well as pre-operative.

| Main features

- + Automatic refilling time
- + Optimized for thrombosis prevention auto cuff detection function
- + Suitable for hospital or use at home (before and after surgery)
- + Patient status record (record usage time and number)
- + Convenient one-touch method
- + Full touch screen system for convenient operation status
- + Language selection function

DVT-2600

Professional DVT Prevention System

DVT-2600 is a professional DVT prevention system that works simultaneously, sequentially and comfortably for patients and meets their satisfaction and effective results.

| Main features

- + Optimized program for thrombosis prevention auto operation
- + Cuff connection automatic recognize and program operation
- + Automatic pressure maintenance system
- + Check setting and easy operation through LCD display
- + Automatic battery mode change when power supply fails
- + Built-in battery (max 6~8 hrs)

| Infection Control of Pump

Front

Infection control sheet to prevent from occurring bacteria in a gap of button

Reusable Tubing

International Patented Tube
(No.10-1631016)

Rear

All the holes was filled by lubber to prevent from infection

Walkable & Wearable DVT Pump

DVT-pro

Walkable & Wearable Portable DVT

DVT-pro is based on the same clinical background (Simultaneous compression, 28 secs refilling time) as DVT-2600 and DVT-4000, which are hospital facility DVT pumps.

Its main difference is that it is designed to be easy to move outdoor as well as indoor after leaving the hospital.

The set values are stored(saved) by a doctor's prescription and locked so that a patient can safely use the prescription as home care. The usage history can be monitored by a doctor when they visit the hospital.

DVT-pro provides reusable sleeves for continuous care to maintain an individual's health as well as DVT prevention under a prescription after leaving the hospital.

| Main features

- + Cryotherapy with Air compression
- + Sequential Three Chamber Gradient, Simultaneous
- + Compression (2 x Venous Return)
- + Simple one-touch operation
- + Digital LCD (Visible day & Night)
- + Adjustable locking settings
- + Auto sleeve detection & system check
- + Patient Compliance Recorder

DVT Sleeve

More softness and better quality

We proud of provision superior soft touch of feeling and eco-friendly materials for patients comfortable use careful attachments material and edge design. All sleeves are performed under a quality test of 2 months and passed without any defect. The soft sleeves are very epoch-making. We provide a personal reusable sleeves as well as disposable sleeves for patient's long term care by being comparable with our portable DVT system. **All sleeves are compatible with DVT-4000s, DVT-2600 and DVT-pro**

Soft Materials

It uses the soft inner & outer materials

+ Eco-friendly

PVC free + Latex-free + Phthalate free

+ Durable Quality

2 months spec-in durable test (Minimize 10~14 days for high-risk and Up to 35days (2 months in the US) for high-risk patients (THA, TKA, HFS)

+ Fit-able

It contained a fit-able outer fabric

+ Safety

Skin scratch prevention of velcro hose jack

+ Cooling-inner

Inner material with cooling and & quick dry

Comparison study between calf sleeves and boots sleeves

Calf sleeves(Ref. DS222) and Boots sleeves(Ref. DS241)

DVT/PE development : 0%

Blood velocity : Calf 35% / Boots 65.3%

(P value < 0.01)

Edema of dorsum

Calf 1.8% decrease / Boots 2.3% increase

Laceration

Calf 8 patients / Boots 0 patient

A study on the prevention of deep vein thrombosis and skin response of patients after interactional surgery between boots and calf intermittent pneumatic compression device.

Lympha-Flow

Sequential Compression
Therapy Device

| Upper Limb Sleeve

Arm Chest(AC) overlapping sleeve effectively treats lymphatic edema by releasing stagnant lymphatic fluid from the lymphatic damage area due to breast cancer surgery.

Arm Chest(AC) after breast cancer

Lower Limb Sleeve

Leg overlapping sleeves have 8 sizes, small, small, wide, small X-wide, Medium, Medium X-wide, Large, Large wide, Half medium, Half Medium Wide for post-operative care after orthopedic surgery like Total Knee Arthroplasty(TKA), Total Hip Arthroplasty(THA), Hip Fracture Surgery(HFS).

Center body sleeve can be used as a pre-therapy sleeve to open the lymph node of the center of the body before upper limb or lower limb and covers the genital and lower abdominal regions for post-care due to hysterectomy or ovarian cancer.

MK400L

Professional Model for Physiotherapy Room

MK400L is a sequential intermittent pneumatic compression (SIPC) system. This model has the optimized functions for professional uses and the sleeves of 6 chambers compressing more minutely. Especially the selection of reverse mode can help arterial circulation by sending blood from the distal part to the proximal parts of a body as well as venous and lymphatic circulation.

| Main features

- + Use durable domestic air motors
- + Periodic reverse pressurization of selection mode
- + Use various cuffs according to user's area
- + Detailed pressure / time / speed setting function
- + Care for your choice of foot / calf / knee / thigh

LF-900

Personal Model for Recovery Room

LF-900 is a semi-professional compression system with a compact design and effective therapy programs including four compression modes. The device provides automatic operation with an easy START / STOP button or you can select more tailored programs like time, pressure, speed, chamber to be inflated and mode.

| Main features

- + Use durable domestic air motors
- + Operation time setting massage time 5~90 minutes
- + Use various cuffs according to user's area
- + Detailed pressure / time / speed setting function
- + Care for your choice of foot / calf / knee / thigh

LF-400

Personal Model for Recovery Room

Physio
Therapy

Post
operative
&
Home

LF400 is designed specifically for the effective drainage of the lymphatic system. It features three treatment modes that are pre-therapy. Pre-therapy mode prepares the lymph system for drainage by clearing the lymph nodes. Straight sequential mode with gradient gently and effectively moves excess fluid proximal towards the body.

| Main features

- + Sequential pressurization for effective lymphatic edema
- + Optimization of lymphatic edema due to breast-related disease
- + Pre-therapy mode for effective lymphatic drainage
- + Lock mode prevents malfunction due to keypresses during operation
- + Easy to operate with 3.5 inch wide LCD screen

CTC-7

Cryo.Thermo.Compression system

To accelerate patient's recovery and shorten hospital stay

CTC-7

Continuous Thermo Compression System

CTC-7 wraps simultaneously deliver heat or cold water and active air-compression to help prevent and treat your body injuries. Active air compression helps to reduce the swelling heating further reduces swelling, muscle spasm and pain.

| Main features

- + Cold + Heat + Contrast therapy
- + It can be drained automatically, so much easier to use
- + Easy maintenance with digital temperature control
- + It has no ice or hot substances, only needs water
- + Definite care for selectable body parts wraps

| Main features

Cold + Compression	Hot + Compression	Contrast + Compression
Steam Cleaning	Auto Drain	Auto Water Check+

Veterinary Treatment

CTC-7

Continuous Thermo Compression System

CTC-7 system helps an animal's fast recovery from various surgical treatments, including joint damage, trauma, post-operative recovery, and inflammation as well as pain relief.

Chronic & Acute pain relief, inflammation, relief fast recovery of wound, ulcers, sores

Muscular contracture
Muscular sprains and strains
Musculoskeletal trauma

Fracture

Degenerative articular

CTC BAND

Continuous Thermo Compression Band

CTC band is a representative brand of our pain relief which maximizes pain relief effect by applying pneumatic technology at the same time to cold treatment can be used effectively in professional medical facilities of fitness.

| Main features

- + Usable temperature is -15c ~ 60c, both cold and warm
- + Cryo and thermo-therapies are available because the required temperature range is within -15c to 60c
- + Wearing fit is good as the fabric quickly takes away the surface moisture from the condensation
- + Strong pressure of velcro provides effective cooling and warming effect

REHABILITATION

Hand Pneumatic Rehabilitation
REHA PRO (RL-500)

REHA PRO

Pneumatically Rehabilitation System

REHA PRO(RL-500) improves the functional range of motion in the hand for a variety of neurological post-surgical conditions. Increasing range of motion can be addressed at the wrist and finger joints through repeated passive range.

| Main features

- + Improvements of muscle tone and ROM(Range of Motion)
- + Brain stimulation & mind motivation
- + Friendly and comfortable design
- + Safety pneumatic motion against sudden convulsion
- + Easy setting on the touch screen
- + Auto recording of clinical improvement data for treatment term
- + Comfortable universal arm stand
- + Individual hand size adjuster
- + Optional finger stretching glove

| Brain + Mind through visual + Auditory stimulations

Identify the movement of patient's finger and wrist on the display.

Set the sound intensity to be higher when approaching the setting angle.

There is a limit in improving the stiffness when passive repetitive movements are continued with general rehabilitation devices

Psychological induction of patient's active involvement

Rehabilitation exercise system combined brain + mind exercise

SPORTS & HOME RECOVERY

Portable Compression System

SP-1000, SP-2000

LX7max

SP-3000

SP-1000 & SP-2000

Sports Recovery System

SPO-PRESS series is a portable compression system providing refreshed massage with dynamic compression program after sports or fitness exercise. SP-1000 has a time and pressure controller, whereas SP-2000 has the individual pressure controllers which the users can adjust the pressure per chamber of the cuff depending on the body conditions.

| Main features

- + Durable & powerful air motor
- + Easy to set controllers
- + Portable design to carry
- + Convenient handle design
- + Individual pressure setting per each chamber
- + Various sleeves selections of leg, arm, waist, and mat

LX7 max

The Luxury Home System

LX7 max can be used more professionally by combining with the center body cuff, the final infrared heating system or lower body set. For your healthy and beautiful body, the air compression system is an effective device which effectively drains the stagnant lymph including toxin, waste or fat cells dissolved from the professional slimming are through the lymphatic circulation.

| Main features

- + Durable & powerful air motor
- + Friendly user interface
- + Desired intensive compression care
- + Skip mode on the damaged area
- + Various sleeves selections of leg, air, center body, waist, and mat

SP-3000

Recovery Compression System with 6CH Sleeve

SP-3000 is designed by DS MAREF that has accumulated 30 years of know-how in the pneumatic technology field. It is designed to be easy to set up for anyone from the user's perspective. It automatically senses the size of each user and the kind of sleeve and provides the optimum feeling to users. 6 chambers provides 6 pneumatic spots with more precise massaging.

| Main features

- + Time: 10 / 20 / 30 min
- + Pressure: 50~230mmHg
- + Manual mode : Massage / Circulation / Combination / Intensive / Full mode
- + Auto mode: It automatically detects each sleeve and works with the optimized protocol for the detected sleeve
- + Skip function: It can be selected according to safety or intensive care and skipped on the part with ulcer, pain or damage
- + Sleeve kinds: Leg / Arm / Waist / Stretching Mat 6
- + Sleeve chamber: 6 chambers
- + Air sensor: Air sensor detects the set pressure to be working exactly on to the body
- + Remote controller + Maintenance of pump + Solenoid + Pump use of time

| Stretching Mat 6 (Air moving mattress)

Stretching mat 6 (Air moving mattress) is designed as an alternative exercise item for anyone suffering from movement due to various causes like accident, age, diseases, and obesity.

This mat can improve the range of motion, muscle tone, physical movement from repetitive exercise.

The mat 6 can be used anywhere as it is a portable and light type as well as a wellness center, sports area, fitness, beauty salon, and home.

1CH ~ 4CH (Waist ~ Neck)

5CH ~ 6CH (Shoulder Tilting)

Recovery Bag

Compression System with Versatile bag

Robust and delicate materials and high levels of storage.
Meet the recovery bag, a combination of convenient and reliable storage separation and refined design.

| Main features

- + Shoes storage
- + Extension zipper
- + Carry to products with sleeve
- + Tower storage
- + Hose hole
- + Power cord hole
- + **Non-slip long strip**

Stretching Mat 6 (Air moving mattress)

The smart storage space, which is separated from the high-quality padding lining, enables and spatial storage. Hand-carrying with a sturdy, stylish handle, and comfortable carrying around on your shoulders with a line of comfortable materials.

- Take it with you in the gym
- Robust and convenient carry-on in parks or outdoors
- Easily take it with you in the office

Useful & finest duffel-bag design

Receive more conveniently

Laptops, books, and other sporting goods are also available

DL1200H

Professional Circulation System

DL1200H has various sleeves as full-body, leg and arm for effective drainage and minute 12 spots of treatment by a total of 12 chambers. The full-body sleeve can be combined with the patented infrared heating system as 2 in 1 therapy. The solid case and stable inner parts are very quiet while running. Users can set customized protocol with 8 compression modes about pressure/time/hold and interval functions according to a client's conditions.

| Main features

- + 12 chambers sleeves of overlapping structures
- + 8 compression modes
- + Quiet operation by solid and thick design
- + Easy to check the setting on LCD display
- + Individual or whole pressure setting
- + Precious gradient pressure setting
- + Attached zippers that can adjust various sizes
- + Various combination with full body, leg, arm sleeve and infrared heating system

| 2 in 1 Infrared & compression treatment

The combination of compression and IR heating makes a body warmer and promotes a user's metabolism. At the same time, it can discharge faster and easier wastes of body through body's improved circulation system.

MK-300L

Professional Circulation System

MK-300L is a sequential intermittent pneumatic compression (SIPC) system. This model has the optimized functions for professional uses and the cuffs of 6 chambers compressing more minutely. Especially, the selection of reverse mode can help arterial circulation by sending blood from the distal part to the proximal part of a body as well as venous and lymphatic circulation.

| Main features

- + Use durable domestic air motors
- + Periodic reverse pressurization of selection mode
- + Use various cuffs according to user's area
- + Detailed pressure / time / speed setting function
- + Care for your choice of foot / calf / knee / thigh

| MK-300L's three basic modes

There are three optional modes available for MK-300L. You can twist one chamber, or wrap it all around, and go up one step by step. Care your body in the mode you want.

+ A MODE

Which one chamber steps up step by step

+ B MODE

One chamber is added and raised step by step

+ C MODE

Circulation mode mixed with A and B mode
