Class 01 Carcinogen

Fine Dust Blocking

Excellent **B**lockability, **V**entilation and **V**isibility
Poongchang Fine Dust Proof **Screen Filter**

Install the air cleaner on the windows!

ISO9001인증업체

If You Love

No matter how **many times you** turn on the air cleaner indoor space, you have to ventilate it.
Also, Even if you have already installed the insect screens, **fine** dust flows into the house when you ventilate the house.
That's why you need to install the dust proof screen filter that blocks fine dust from outdoors.

Other brands have some weakness that the **fine** dust blocking rate is high but it is not ventilated as well as view is **not clear therefore** it is uncomfortable when using it in real life.
Our products provide a clear view from the inside, **Also give the** privacy protection effect.

with rainwater

UV protection effect

Anti-microbial,
Anti-bacterial
Effect

Condensation prevention
Thermal effect

Easily build on existing sash

Excellent ventilation
Excellent natural ventilation

Excellent visibility

Immediately check fine dust, secure visibility and ventilation

	visibility	Ventilation	Durability
Other Brands	Difficulty in securing the visibility due to triple adhesion	The higher the blocking rate of fine dust but the less ventilation	Glass fiber lose their glass fibers after a certain period of time.
PoongChang	Clear vision is secured by weaving method	Blocks fine dust and provides good ventilation	Up to 20 years

The Safest.

The Longest UsingTime.

Why? Poongchang Fine Dust Proof Screen Filter

Poongchang is loved because it is a professional company that researches and develops functional insect screens, dust proof screen filter based on craftsmanship also it is the company which manufactures and constructs pure domestic products.,

Unique self heat treatment technology with proven safety and excellence

| Domestic Weaving Method (Visibility)

It's made of weaving method, not glue, provide a clear view
Products attached in two or three layers have little ventilation effect and poor visibility.

| Flame Retardant Treatment

Eco-friendly material, even if there is a fire, the flame does not spread and there is no toxic gas.
Products glued in two or three layers are vulnerable to fire.

| Eco-Friendly Domestic Monofilament Company

Not using Chinese Glass **Fiber**, **Using** eco-friendly domestic monofilament products.
Glass fiber product lose their glass fiber after a certain period of time.

| NO Glue

Eco-friendly because it doesn't use glue.
Using glue in two or three layers, It can be harmful your health.

| Self Heat Treatment Technology (Patent)

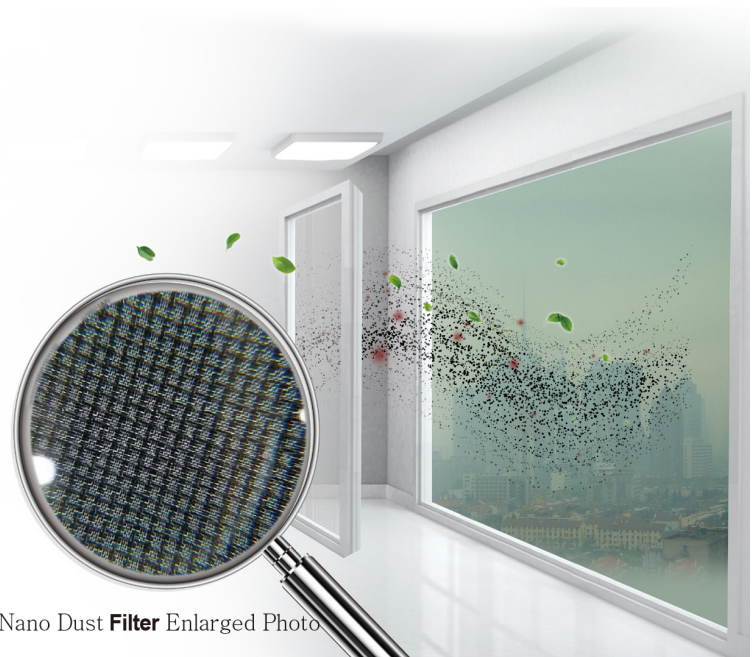

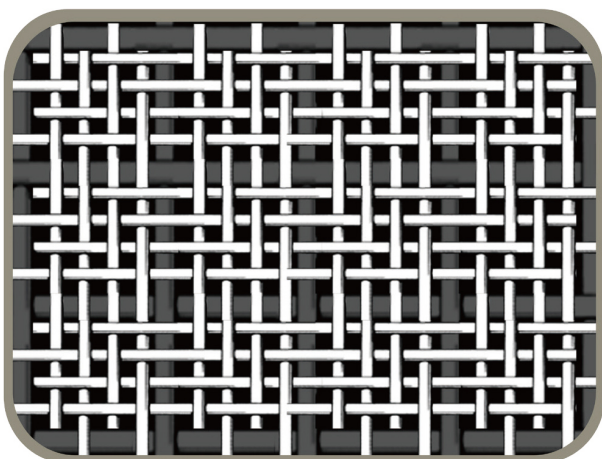

It is the leader in the insect screen market with patented unique self heat treatment technology

| Durability

Because of the monofilament material, it is durable like a fishing line and lasts up to 20 years.

It protects the fresh and clean air.

風창's Fine Dust Screen Filter

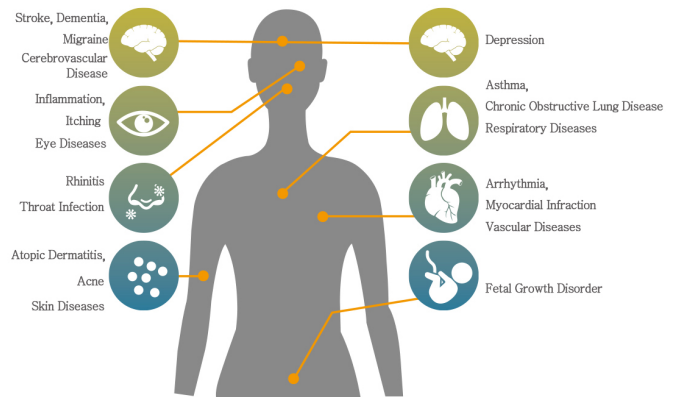

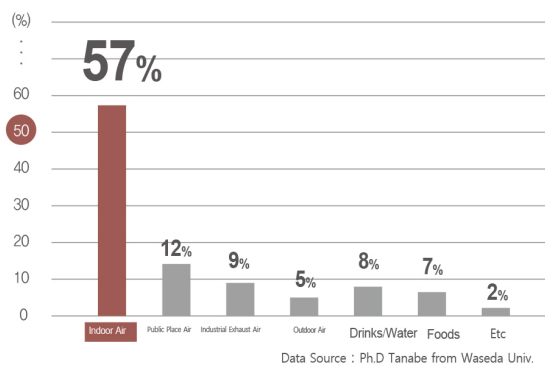

Ventilation, Why is it important?

When you open the windows, Immediately the indoor space is full of harmful substances.

57% of harmful substances entering our body is due to indoor air!

Indoor air is not safe either.

Fine dust and harmful substance that enter the indoor and exist in the air, there is 2-5 times more pollutant in the closed indoor than outdoor, our bodies that breathe more than 11,000 liters a day will accumulate harmful substances.

The Effect of Fine Dust on Health

Fine Dust Day, Do **You** ventilate regularly?

Unventilated indoor, Above 100 of the fine dust acceptance criteria
Is your window open on the fine dust day?

**100-Fold
Pollution**

Up to 100 times indoor air pollution without adequate ventilation, according to the U.S. Environmental Protection Agency (EPA)

**Class 1
Carcinogens**

Fine dust has been designated as one of the top carcinogens by the World Health Organization. This causes respiratory and cardiovascular diseases.

**Social
Trend**

The importance of indoor air is emphasized by climate change. Therefore, the fine dust proof screen filter market will be expanded to schools and public institutions as well as houses.
