Hanji raw Cotton Shroud entirely returning to nature

Our traditional shroud has been arranged as the best clothes among the ones worn in one's lifetime.

That's why colorful is the shroud during the Joseon Dynasty period, which was discovered in the process of grave relocation. Mostly, our traditional shroud was made of silk or silk fabrics. Children bereaved of their parents used to wear a mourning dress of hemp cloth as a meaning of 'I am a sinner.' The outer surface of Hanji shroud covers the deceased in dignity with Hanji while the inner surface of the shroud envelops the deceased with a soft feel of raw cotton. Hanji raw cotton shroud perfectly loses its weight in time of burial, and it is perfectly consumed without the occurrence of impurities and discoloration of remains in time of cremation. Daesung Medical-manufactured shroud is a functional one made based on the fact that people used Hanji in time of burial or grave relocation from old times because of the belief that wearing paper clothes is good for a person's bone.

A man's shroud

A woman's shroud

Use of the cotton-manufacturing method in medical circles

Making of clean, safe DIY wet tissues

When water is put in a Cotton & Sesomi Dry Tissue, it is available for the day!

- ✓ A Cotton & Sesomi Dry Tissue is, in principle used for the day when water is put into it because it doesn't contain any preservatives.
- ✓ By the nature of a dry tissue, the official expiration date is 3 years in a dry state.
- ✓ It'd be better to keep it in a place without humidity.

- ① Users are advised to fold it after letting about a 3-centimeter extra remaining by taking out only the quantity to be used.
- ② Then, pour the water in a water purifier, or clean water moderately into the folded tissue.
- ③ Then, adjust the wanted degree of moisture by squeezing a wet tissue dry with clean hands.
- ④ After moderately squeezing water, contain the tissue in a zipper bag neatly.
- ⑤ Then, you have only to use one sheet of tissue after another whenever necessary by opening the cap of a zipper bag.
- ⑥ It'll be ok for you to use it in place of toilet paper by putting the folded tissue into a zipper bag without moistening it.

Dry Tissue-saving type 2kg

200 X 150(mm)

Fabric 100% pure cotton
Weight 65gsm
(The thicker, the higher the basis weight.)
Composition Putting it in a kg unit by cutting it by size
(Approximately, more or less 1,000 sheets)
Characteristic Only the size gets bigger slightly by making up for the absorption force of 1 kg Sesomi.

Dry Tissue 20 sheets

200 X 210(mm)

Fabric 100% pure cotton
Weight 65gsm
(The thicker, the higher the basis weight.)
