| 4 OUR SKIN

“Cosmetics make you beautiful like a rose, but be careful as it might prick your health and the environment.” We will focus to improve and consider each and every issue that arises from our products.

4 OUR SKIN's brands represent our philosophies and values. We give you our word to provide reliable products and services for not only for people but also for a green world.

We will always be by your side.

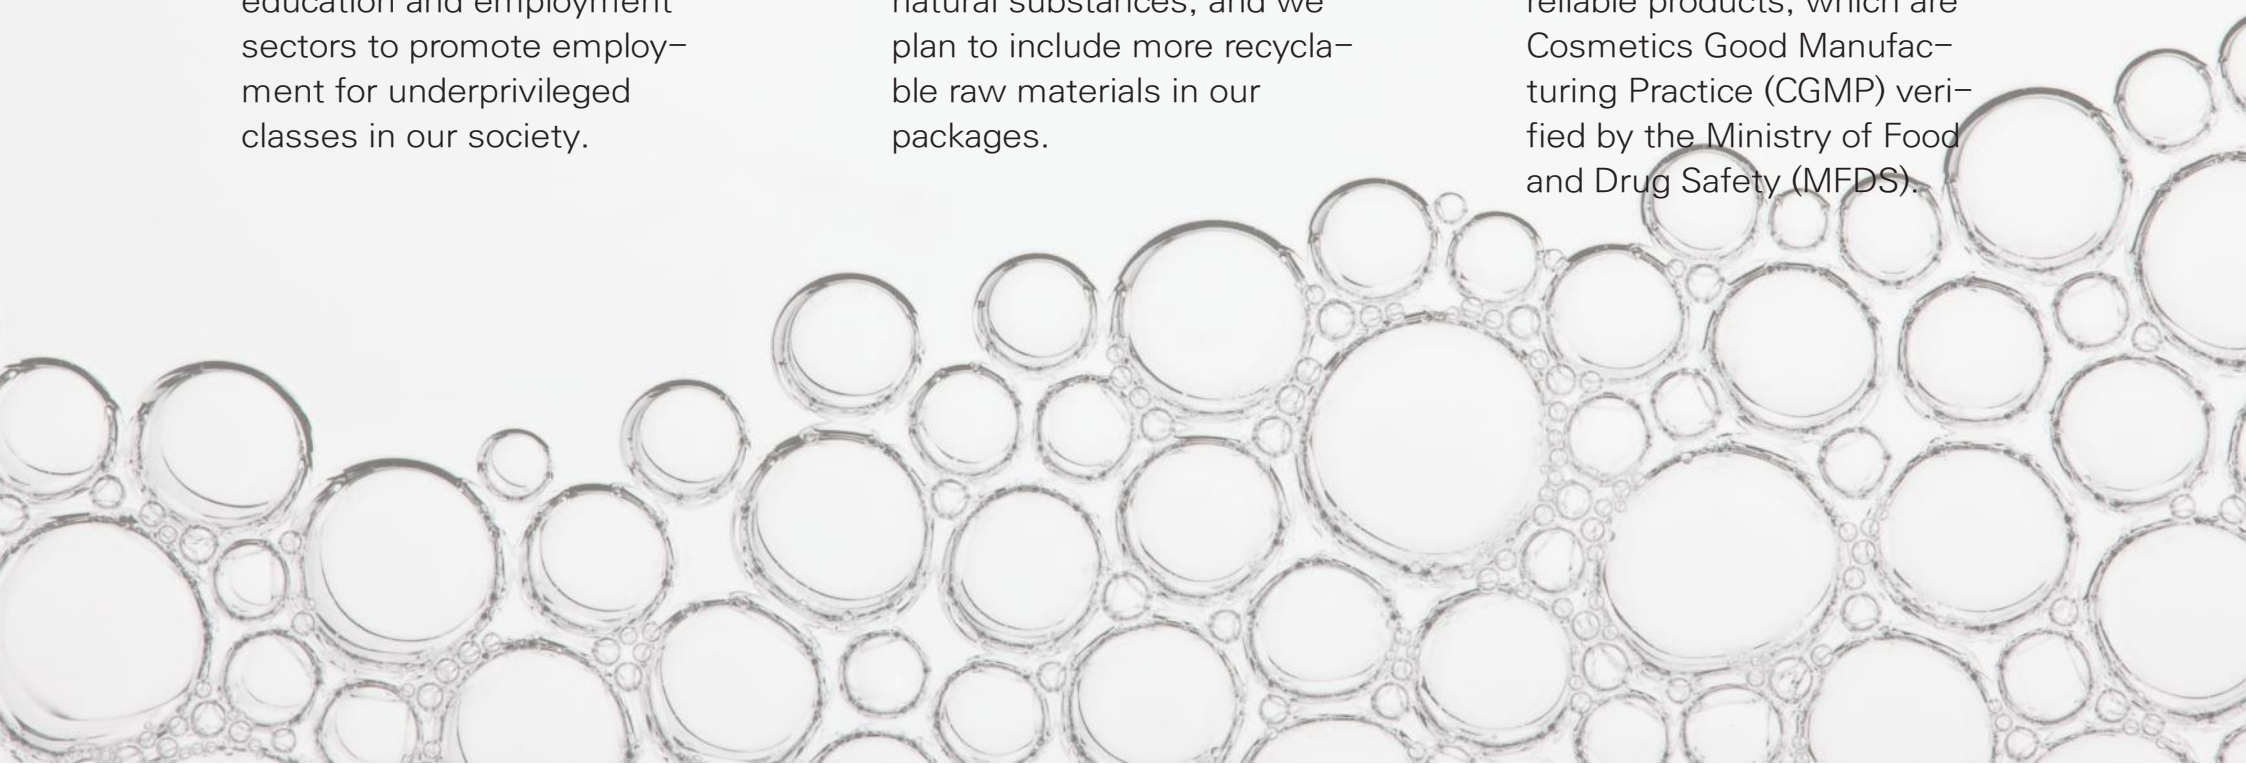

We actively support the education and employment sectors to promote employment for underprivileged classes in our society.

Our products contain healthy natural substances, and we plan to include more recyclable raw materials in our packages.

We provide trustworthy and reliable products, which are Cosmetics Good Manufacturing Practice (CGMP) verified by the Ministry of Food and Drug Safety (MFDS).

TUPS
LABORATORIES

BRAND STORY

TUPS continuously works on studying and developing products for healthy skin. Our philosophy lies in striving to provide health benefits to people and the environment by collaboration with the local community, and providing products composed of exclusively good ingredients.

TUPS Professional provides products for experts, such as skin care specialists or dermatologists, and is used for professional skin treatment. Our brands are currently distributed to skin care parlors and dermatologies in Korea, and shows good clinical test results for skin-lightening and elasticity.

M-GF Intensive kit

High Performance
M-GF Intensive Ampoule

High Performance
M-GF Intensive Cream

High Performance
A.B.L Pollution Refiner

Professional

High Performance M-GF Intensive kit

(For Experts) Kit with skin-lightening, anti-wrinkle, and skin regeneration effects

Components: Dual functionality ampule with skin-lightening and anti-wrinkle effects (5 ml, 6 ea), Anti-wrinkle functional cream (35 ml, 6 times of use)

Main Ingredients: Niacinamide, Adenosine, 10 types of Hyaluronic Acid, Peptide Complex

Function: This product contains niacinamide and adenosine, making your skin clean, luminant, and healthy. Niacinamide effectively restrains the activation and transportation of melanin-forming tyrosinase—making your skin clean and flawless. Adenosine, the only anti-wrinkle functional ingredient verified by Korea's MFDS, strengthens cell proliferation in the dermal layer and self-regeneration of the skin.

* 히알루론산 10종 Hydroxyethyl Acrylate/Sodium Acryloyldimethyl Taurate Copolymer, Hydroxyacetophenone, Sodium Hyaluronate, Hydroxypropyltrimonium Hyaluronate, Hydrogenated Lecithin, Hydrolyzed Hyaluronic Acid, Sodium Acetylated Hyaluronate, Hyaluronic Acid, Sodium Hyaluronate Crosspolymer, Hydrolyzed Sodium Hyaluronate
* 펩타이드복합체 sh-Oligopeptide-1, sh-Polypeptide-11, sh-Polypeptide-1, sh-Oligopeptide-2, sh-Polypeptide-3, sh-Polypeptide-16, sh-Polypeptide-4, sh-Polypeptide-81, sh-Polypeptide-8, sh-Polypeptide-59, sh-Polypeptide-9, sh-Polypeptide-60, sh-Polypeptide-2, sh-Polypeptide-22, sh-Polypeptide-69, sh-Polypeptide-64

TUPS LABORATORIES' one-of-a-kind moisturizing technology shows excellent moisturizing effect with 10 types of hyaluronic acid

Step 1 Penetrates Moisture Deep into your Skin

Ultra small molecules of hyaluronic acid penetrate deep into your skin, driving contained moisture to the skin surface. It continuously moisturizes your skin, making it soft and supple.

Step 2 Moisturizing Effect

The product activates Aquaporin3 expression, strengthening moisturizing power of the skin, and drawing moisture from its surroundings, evenly distributing affluent moisture throughout your skin.

Step 3 Long-term Moisturization by Ensuring Full Skin Contact

Sodium Hyaluronate fully attaches to your skin along with hyaluronic acid, which has molecular-like properties, and forms a firm layer of moisture that maintains long-term moisturization and prevents wrinkles.

Cantella Asiatica, Natural Substance that Rejuvenates and Soothes Skin

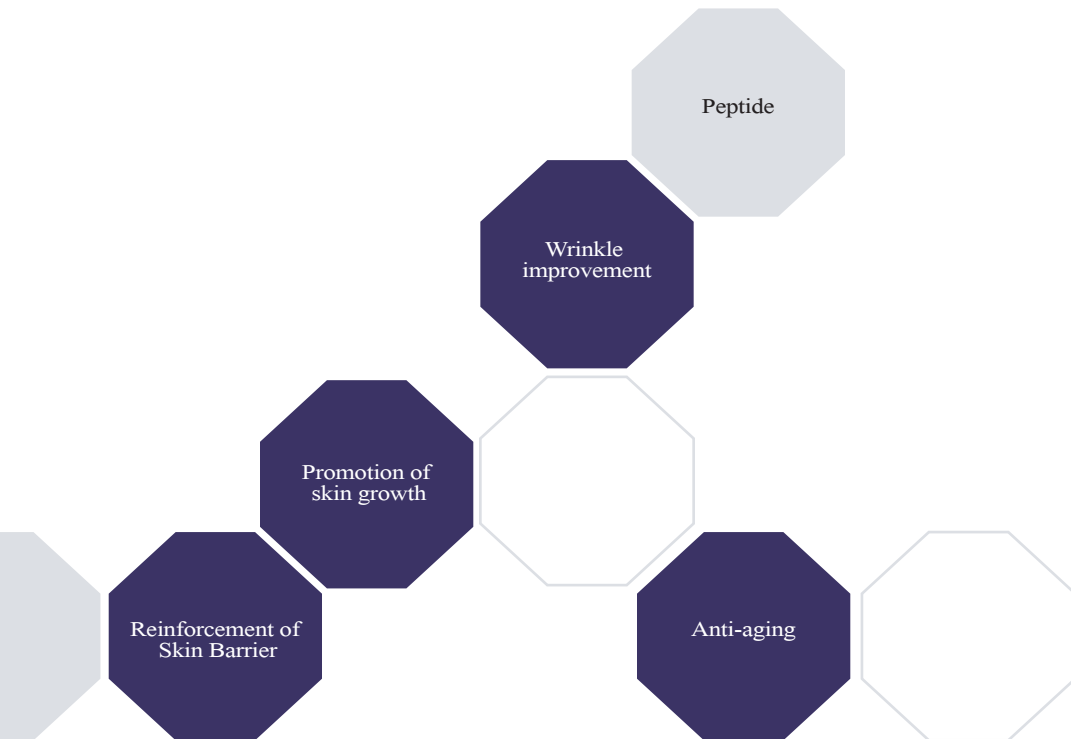

M-GF Intensive Ampule and Cream contains cantella asiatic, which is fit for atopy treatment due to its effectiveness for skin wounds. M-GF Intensive KIT also presents healthy skin by its natural substances that rejuvenates and soothes skin.

Natural ingredients

Madecassoside	Skin-regeneration, skin-elasticity, sebum control
Madecassic Acid	Skin-calming, anti-bacterial, anti-inflammatory, antioxidant
Asiatic Acid	Skin-elasticity, hypo-allergenic,
Asiaticoside	Anti-wrinkle, skin-elasticity, hypo-allergenic

Multi Peptide Complex (16 kinds)

Peptide is like a “protein energy bar” for your skin. It is an anti-aging substance that facilitates the synthesis and activation of collagen. Significantly, the M-GF Intensive Kit contains 16 types of anti-wrinkle multi peptide complexes through effectively generating collagen and anti-inflammatory functionality.

Multi Growth Factor EGF, IGF-1, aFGF, bFDF, VEGF

EGF, a multi growth factor, combines with the receptor in the skin surface to drive production of new cells. It is one of the growth factors innately possessed by people that makes new cells grow faster than old skin cells. Long-term use of such cosmetics rich in cell growth factors (GF) support skin-reproduction by supplementing cell growth that prevent wrinkles and lifts skin. The M-GF Intensive Kit contains not only EGF but also various cell GFs, such as IGF-1, aFGF, bFDF, VEGF, so it effectively reproduces your skin.

*EGF Clinical Test Results (USA, Patent 5618544)

EGF를 0.1 µg/g (0.00001%)-combined lotion was verified to generate a large amount of new skin cells, based on the clinical test conducted on 12 subjects aged 32-62 when used periodically for 60 days.

- / 1-200% of cell growth rate achieved by subjects aged 30-50
- / Average rate of 300-870% cell growth rate achieved by subjects aged over 50

Results verified EGF's excellent effectiveness in skin-regeneration as it produced larger amounts of new skin cells than old skin cells.

Woman in her 40s, concerned about dryness and saggy skin.

“I received TUBS ampule skin treatment for moist skin. It amazingly got rid of skin dryness, something I couldn't do in the last 40 years. It is a must if you want moist and smooth complexion!”

Professional

High Performance M-GF Intensive Ampoule

(For Experts)

Dual functionality ampule with skin-lightening and anti-wrinkle effect that makes your skin bright and tight by recovering skin energy balance.

Main Ingredients

Niacinamide, Adenosine, 10 types of hyaluronic acid, 16 types of peptide complex, β -glucan, Castanea Sativa Chestnut Shell Extract

Function: It effectively lightens up your skin and improves wrinkles.

It contains β -glucan, which soothes skin by curing skin diseases, and possesses excellent moisturization functionalities that protects your skin by forming a water overcoat on the skin surface. Tanin, a substance contained in castanea sativa chestnut shell extracts, has anti-inflammatory and sebum control effects, and not only tightens and minimizes enlarged pores but also brightens your skin by deactivating tyrosinase.

· Cosmetics Good Manufacturing Practice (CGMP) Verified

Woman in her 30s concerned about dark skin.

“My Beauty Manager recommended TUPS ampule skin treatment, since I wanted my skin to lighten up. I feel lightened up already, with just one round of treatment. I usually get TUPS treatment in the mornings, because people gush how clean and lightened my skin looks all day long.”

Professional

High Performance M-GF Intensive Cream

(For Experts)

Anti-Wrinkle Functionality Cream that lets growth factor penetrate into the skin, helping transformation from an old skin layer to a new skin layer.

Main Ingredients

Adenosine, 10 types of hyaluronic acid, 16 types of peptide complex, squalane, caprylic and capric triglyceride, glycyrrhiza inflata root extract

Function: It shows anti-wrinkle effects.

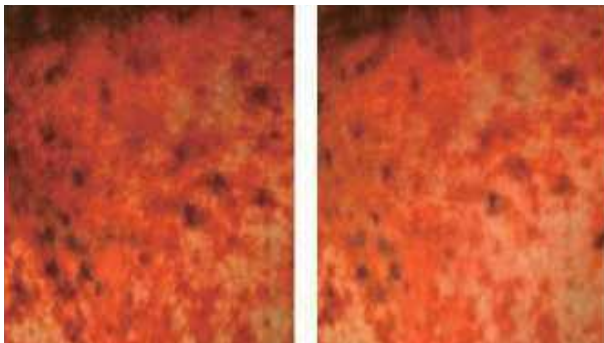

It is composed of caprylic and capric triglyceride, excellent natural moisturizing factors, which specialize in forming water overcoats to store and trap moisture in the outer layers of your skin. It also contains squalane, which regenerates damages skin cells, to support skin-regeneration by activating GFs on the skin surface. It also releases body wastes and toxins as well as obliterating free oxygen radical.

· Cosmetics Good Manufacturing Practice (CGMP) Verified

Function of Glycyrrhiza Inflata Root Extract & Glabridin

M-GF Intensive Cream contains glycyrrhiza inflata root extracts and glabridin, which are effective for antioxidant, obliterating free oxygen radical, and anti-wrinkle for more effective skin care.

Professional

High Performance A.B.L Pollution Refiner

TUPS A.B.L Pollution Refiner has been produced based on 20 years of research for anti-acne products, and our own acne skin care know-how. (5 ml, 3 ea)

Main Ingredients

A.H.A(Glycolic Acid), B.H.A(Salicylic Acid), B-glucan, Panthenol, Hyaluronic acid, Lactobacillus Ferment

It works in three steps starting from dead skin cell management, soothing of the skin, to strengthening skin immunity. Just apply this product on acnes like you would spread ointment on wounds. It instantly soothes skin problems if you do.

Please use the ampule at night to soothe skin problems to effectively reduce acnes and dead skin cells.

This reduces skin problems for your whole body, including face, neck, back, chest, etc.

Effectively reduced skin problems for teenagers to people in their 30s

STABILITY TEST

The Stability Test for cosmetics is mandatory to set the minimum period expiration date and storage method. The expiration date should be set for customers to appreciate good quality for a long period.

1. Long-Term Storage Test

This test is aimed to set the expiration date of the product by verifying its physical, chemical, and microbiological stability and suitability in long-term storage.

2. Accelerated Test

This test aims at evaluating its effect on physical, chemical, and microbiological stability and suitability for containers in short-term acceleration and was tested in an environment with high temperatures over 15°C with high humidity conditions.

3. Stress Test

This test aims at verifying the dissolution process and degradation product, and is generally conducted to review quality variations in case of unexpected or severe conditions occurring during transportation, storage, display, and usage. *Freeze-Thaw Tests, Low Temperature & High-Temperature Tests, and Temperature Difference Tests

4. Stability Testing After Opening

This test aims at setting the expiration period of the product while considering potential contamination that might occur while using the product. A long-term storage test is conducted to check physical, chemical, and microbiological stability and suitability for containers.

All TUPS brands have passed every Stability Test mentioned above, guaranteeing your safety.

TUPS Professional provides products for experts, such as skin care specialists or dermatologists, and is used for professional skin treatment. Our brands are currently distributed to skin care parlors and dermatologies in Korea, and shows good clinical test results for skin-lightening and elasticity.
