

# HWANGTO C.G PYEONBAK

“ECO-FRIENDLY CONSTRUCTION MATERIALS COMPANY  
WHICH CONNECTS NATURE AND HOUSE”

# Company introduction

---

## **We will be developing as the challenging and creative company.**

Return nature to humans. People are living in a residential space where it is filled with a great deal of pollution and harmful substances when they are not prepared for the rapidly changing society and environment.

Hwangto C.G Pyeonhak is developing, under the corporate philosophy of setting itself free from the Sick House Syndrome and chemical substances and returning nature to humans based on the production of the home-grown "building materials using the yellow soil and cypress charcoal," with

**Righteousness Management : Honest and truthful production and management**

**Win-win and Coexistence : Task performance for co-prosperity between company and consumers**

**Creative Management : Introduction of future-oriented and sustainable management and production method without settling for the present as core values and beliefs of the corporate management.**

All the employees will strive to improve the living quality of consumers founded in the healthy living environment. We expect your support and encouragement and wish you good health and happiness.

Thank you.

CEO *SungJun LEE*

# About Healingtile

## Features and efficacy of yellow soil charcoal product

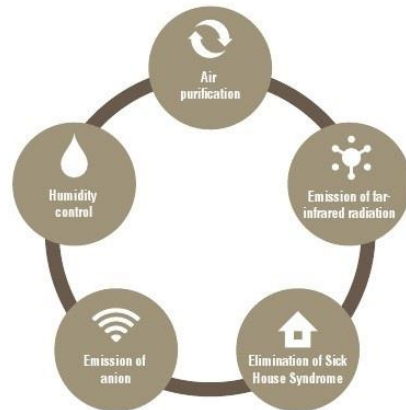

Yellow soil has a wide honey comb structure. As a great amount of far-infrared radiation is absorbed into the sponge-like hole, it is called a "solar energy storage." People living in the yellow soil house say that "I feel refreshed and my complexion looks better after a sound sleep." or "The air in the room is fresh and I feel like I am outside the house." It is because the far-infrared radiation emitted by the yellow soil keeps the body warm and activates cells helping metabolism such as the blood circulation.

With the rich charcoal layer which utilized the home-grown cypress tree inside the yellow soil, the air purification ability is increased substantially. The "yellow soil cypress charcoal material" is the nation's only product for an easy odor removal and humidity control.

### Strengths of Yellow Soil Art Tile

- Economical without a need for wall paper
- Easy management and semi-permanent
- Varied in shape and color
- Blocking absorption of electromagnetic waves of home electronics
- crack-smear-free and bill saving

### Efficacy of Yellow Soil to Human Body
