Main product	Auto Parts (Cutting, Stamping, Tapping, and Precision Machining), Aluminum Extruding Products (Auto, Ship/ Marine, Aircraft, Industrial, Construction, etc.)
License & Certification	ISO 14001:2015, ISO 45001:2018, IATF 16949:2016

"DIVISION Co., Ltd." is a company that specializes in the manufacturing of automotive components and general industrial parts. We also produce automotive components that require robustness, such as engine pumps, brakes, and products for shock and vibration absorption. Our main production processes include precision machining, cutting, stamping, and tapping. In addition to these processes, we also conduct aluminum extrusion, leading to the supply of aluminum extrusion products and their processed components to various fields, including auto parts, general industrial parts, and construction materials.

Product Introduction

< Auto Parts: AL Extrusion (above) & Steel parts (below) for brake valve, shock absorber, anti-vibration, steering system, and more >
