Design

Dual-cleansing  
Effect

Cost Effective

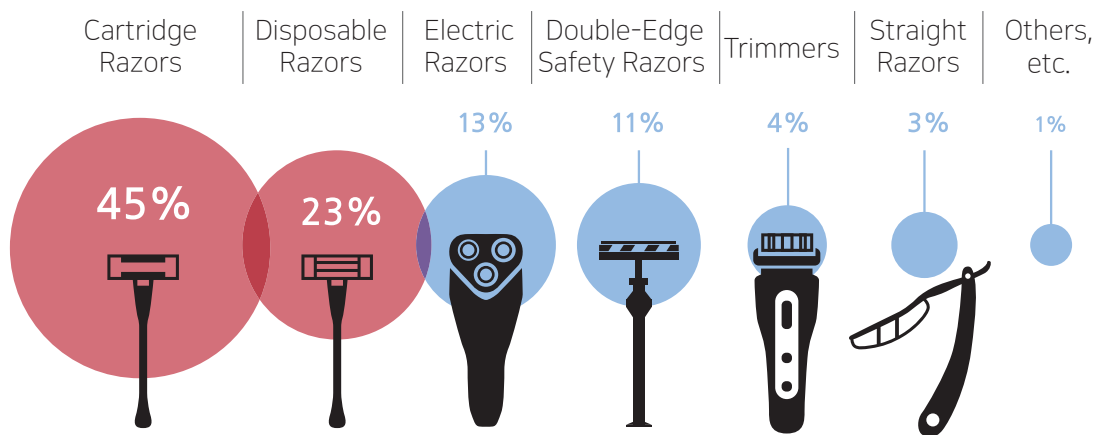

Eco-friendly

Patented  
Technology

The majority of men, 68%  
use either cartridge razors or  
disposable razors.

## 2 billion disposable razors are discarded globally every year.

Every year, hundreds of thousands of disposable razors are likely to be used and discarded. People who shave with disposable razors typically replace them every 5 to 6 weeks. If we multiply this number by the number of people who shave, considering that the average person shaves 2 to 3 times a week and a disposable razor lasts about 10 shaves, from an environmental perspective, this creates a very detrimental situation for the ecosystem. Additionally, it is said that 32% of plastic products are discarded into the ocean. According to related data, 2 billion razors are discarded every year, and many of them are not properly recycled.

# Galline pads can make a big difference

## ***GALLINE BLACK MANNER***

### GALLINE Black Manner Razor Pad

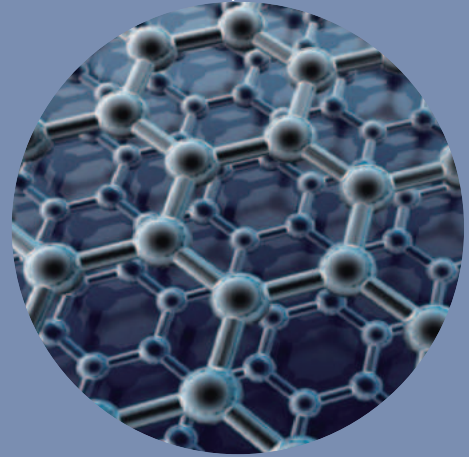

#### ■ Specifications

Product Name	GALLINE BLACK MANNER
Material	Carbon, EPG, EPDM, PP
Color	Black
Dimensions	2.75 × 4.72 in.(7×12.7cm)
Inner Dimension	2.36 × 3.93 in.(6×10cm)
Thickness	0.039 in.(13mm)
Weight	96g
Recommended Expiry Date	2 Years
Compatibility	All Razor Blades

## Advanced Material(EPG)

By combining lightweight carbon with carbon composite structures, known as super materials, we have created an innovative material called EPG.

Carbon

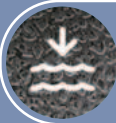

EPG

PP

Polypropylene

EPDM

Ethylene Propylene Terpolymers

Depth of **120μm**

## Mechanical engineering design

Structural engineering depth  
pattern application

**120 μm**

Always like brand new, make razor maintenance easy

A clean and well-maintained  
razor prevents skin irritation and cuts

### Problems with using an unmaintained razor

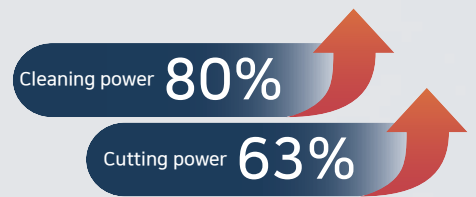

1 | Cuts from  
dull blades

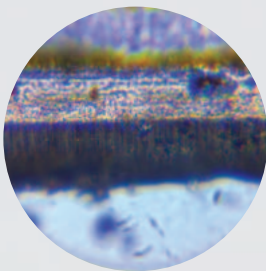

2 | Skin irritation caused by  
unsanitary conditions

# Dual-cleansing Effect

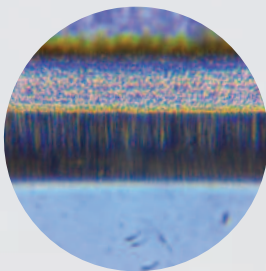

## GALLINE Black Manner Pads

help maintain healthy skin by thoroughly cleaning your razor blades, removing dirt, dead skin, oil, and bacteria.

Before

After

Before

15 uses

30 uses

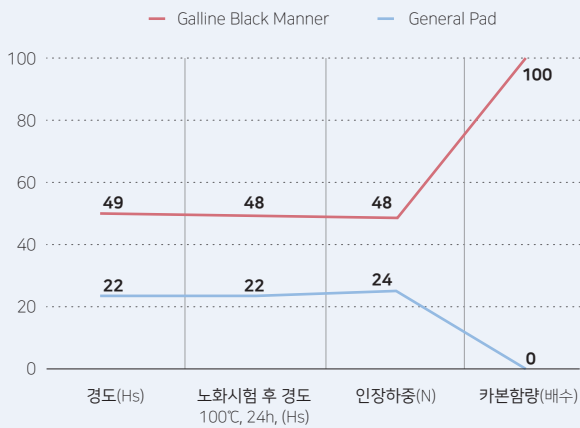

# It significantly outperforms similar products from competitors.

## Differentiated Polymer Material Processing Methods

- Application of polymer compounding processing technology to develop pads that temporarily restore the sharpness of dull razor blades.
- Development of pads that enhance hardness and tensile load by more than twice, offering properties that are completely different from standard pads

Results of comparison of material performance with representative similar product 'General Pad'. | Korea Testing & Research Institute for Chemical Industry\_KTR

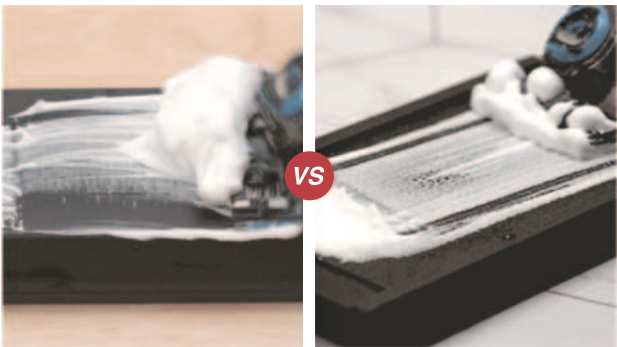

Polymeric Material

Galline Black Manner :  
EPDM, PP, CARBON COMPOUNDING BLENDING

General Pad : Rubber

## Comparison of product quality with similar products from multiple other brands.

### Competitor vs Galline Black Manner

- 1) The surface lack the depth or elasticity for thorough cleaning.
- 1) The robust surface elevates the razor blade for primary cleaning.
- 2) Random protrusions physically delve into the blade edges, enabling secondary deep cleansing.

	GALLINE BLACK MANNER	Razor Booster	Nanofix
Level Friction	High	N/A	Low

Compatibility	All Razor Blades	All Razor Blades	All Razor Blades

# Stop wasting money on razors. Save now.

## Significant cost savings

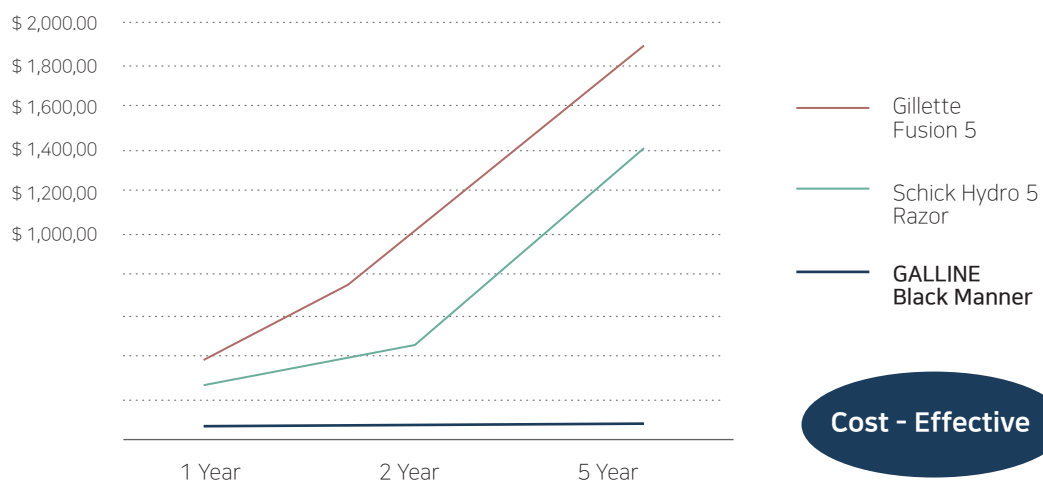

Using a GALLINE pad can significantly reduce your razor blade replacement costs.

## Gillette vs Schick vs Galline Black Manner

# of Blade Refill by Time	Gillette Fusion 5	Schick Hydro 5 Razor	1 Razor with Galline Black Manner
1Week × 1Blade Refill	\$4.64	\$3.31	No Cost
1Month × 4Blade Refills	\$18.56	\$13.24	No Cost
1Year × 4Blade Refills	\$222.72	\$158.88	No Cost

## Cost comparison: 5 years of using a GALLINE pad.

It prolongs the life of razor blades, leading to a substantial decrease in repurchase frequency

# GALLINE BLACK MANNER

## Usage Instructions

### Components

---

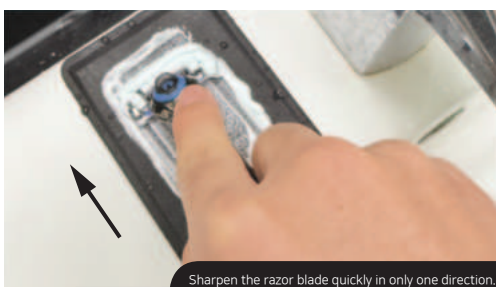

- ❶ GALLINE BLACK MANNER
- ❷ User Manual

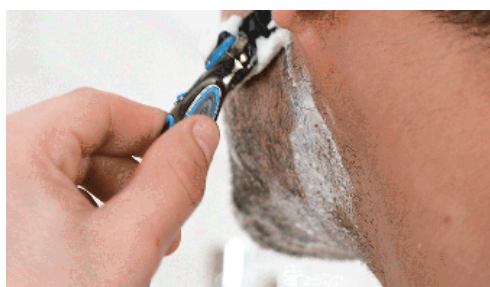

❶/ Simply rinse the pad with water.

❷/ Apply a generous amount of shaving foam to the pad.

❸/ Place the razor blade on the pad as shown in the picture, and repeatedly glide it in a forward direction only (quickly, in one direction).

❹/ With enhanced cutting power, a smooth shave is achievable.

### TIP

---

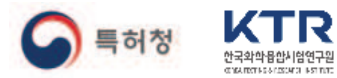

If you have sensitive skin, it is recommended to use the GALLINE pad more than 20-40 times to sharpen the razor blade before shaving every day.

# Proprietary Technology

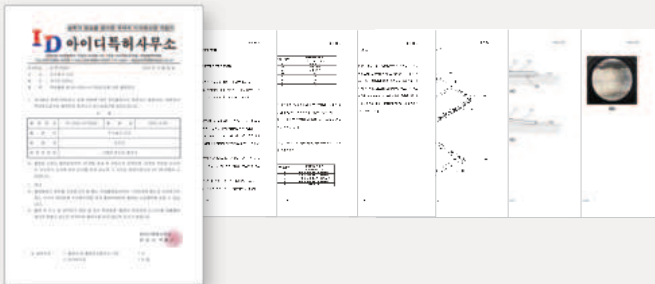

GALLINE Pad is a product with patented technology and has passed safety tests.

Certificate of Application

Patent Specification

Patent Specification Summary

Through material research, the optimal formulation ratio (carbon composite structure) that provides the best cleaning effect and razor blade cutting performance has been identified.

	Composite material (weight %)	Carbon (weight %)	Degree of cleaning and blade sharpening per unit area
1	0	100	Blade damage
2	20	80	Blade damage
3	60	40	Blade damage
4	80	20	95%
5	85	15	80%
6	90	10	65%
7	95	5	50%
8	100	0	5%

Composite material (weight %) : Carbon (weight %) The mixing ratio provides optimal cleaning and polishing effects for razor blades.

## Hardness/Tensile load test for performance comparison.

Differentiating polymer material processing methods by applying polymer compounding processing technology. Developed pads that temporarily restore the sharpness of dull razor blades. Developed pads that improve hardness and tensile load by more than twice, completely different from the properties of standard pads.

## Human Toxic Substance Safety Test.

- ☒ Pb 납 Non-detected.
- ☒ Cd 카드뮴 Non-detected.
- ☒ Cr<sup>6+</sup> 육가크롬 Non-detected.
- ☒ Hg 수은 Non-detected.

With our customers in mind.
