CEO Message

CEO Message (English Translation)

Greetings,

I am Sang-ok Kang, the CEO of Arumteo Co., Ltd.

Arumteo was founded in 2007, built upon my extensive experience and long-standing dedication to the food industry. Today, I lead our company with a steadfast commitment to family-friendly management, food safety, and job creation.

Our corporate vision is to be a “Righteous Food Company” that pursues health and happiness for all. Under our core philosophy, “Beautiful people with beautiful hearts,” we foster a happy corporate culture and implement family-friendly management practices throughout our organization.

With the mindset that “my own family will eat this,” we have obtained HACCP certification to ensure safe and delicious products. Furthermore, we have established an R&D Center to continuously invest in research and development.

Arumteo is also deeply committed to social responsibility. We have entered into industry-academic partnerships to support the employment of vocational high school students and cultivate professional talent. To address the labor shortages often faced by SMEs, we have been designated as a military service exception entity and actively participate in internship programs for youth and seniors.

We pledge to stay true to our founding principles and continue our journey toward becoming an even better and more advanced Arumteo.

Thank you.

Sang-ok Kang CEO, Arumteo Co., Ltd.

Areumteo History

2002

· Foodient Trading Co. > Established (Import & Sales)

Product Inquiry & Delivery Process

01

Product Inquiry

We identify requirements and gather necessary information through consultations and meetings.

02

Assignment of Representative

Both a primary and a secondary representative are assigned to ensure a quick response and smooth project progression.

03

Sample production

We research and develop exclusive products (OEM), inspired formulations (ODM), and proactive proposals (ODM, PB).

06

Shipping & Delivery

Finished products are delivered according to the scheduled date and location via direct delivery, courier services, or dedicated freight trucks, depending on the situation.

05

Trial & Mass Production

We manufacture and inspect the final products while performing real-time quality control and monitoring based on the approved final samples.

04

Feedback & Improvement

We conduct tests under identical conditions as much as possible and create improved samples based on the results.
